Mustin's part-by-part look at hull, deck, rig, and machinery is both a minicourse for transforming used-boat shopping from a game of craps to a science, and the first step in a holistic boat maintenance program. His discussion of the significance of cracks found in aging hulls and decks is the most thorough in print. He is not shy in assessing the lack of regulation of professional surveyors, nor does he shrink from

pointing a finger at shoddy building practices. Having a used boat surveyed is a critical prelude to buying it. Yet a professional survey is expensive--several hundred dollars.

Surveying Fiberglass Sailboats will enable you to conduct your own surveys while narrowing the field, then monitor a professional surveyor's performance when selecting your target boat.

Assessors' Handbook McGraw Hill Professional

Increasingly, employees of regulatory bodies, law enforcement agencies and others who are not trained forensic accountants or experienced investigators find themselves responsible for conducting what amount to financial investigations. An engineer who oversees the cleanup of a toxic waste site might need to track down the former owners of the site to find the polluter. Perhaps the applicable licensing agency receives a complaint that an attorney mishandled a client's money. Maybe it's the attorney who needs help finding the assets with which a client's former spouse has absconded. Training in investigation techniques tends to be very limited for many employees. Training on how to find information without incurring significant expense is virtually nonexistent. This book helps fill the void. An Introduction to Internet-Based Financial Investigations will help anyone who conducts financial investigations as part of their job to reduce their dependence on trial and error by showing

them where and how to look. Using clear sections describing how to approach an investigation, including the ethical perspective; what to look for and what you find; what free and low cost internet resources are available to support investigations; and how to assemble and present the results of investigations, Kimberly Goetz guides students and beginning investigators through the complex world of financial investigations.
